INTRODUCTION

Yanubuks is a company that exists in order to solve the problems faced by the blockchain ICO startups and investors. Yanubuks is not an ICO rating company but we exists in order to secure the interest of the investors by creating an avenue for them to earn more through MASTERNODES of the token/any coins they purchased before and after it is listed in an exchange, we also accept/attract old projects that is interested in offering MASTERNODES to their tokens/coins holders.

We give new startups the opportunity to have access to the cheapest world-class ico fundraising hosting services, thereby making it easier for anybody with brilliant idea to access the professionally designed ICO hosting platform and masternode services.

N.B - We do not endorse any project listed on our platform, please do your due research before investing.

ABSTRACT

Yanubuks is a secure cloud based ICO hosting platform and Tokens/all coins investment Masternode Hosting that operates on ethereum smart contract.

Our ICO hosting platform and Masternode services currently covers all tokens and cryptocurrencies platforms in as much they can mine, instant mine or premine it and deposit it into our masternode developers wallets.

Yanubuks masternodes services supports all tokens and all cryptocurrencies that can deposits into our masternode developers wallet

WHAT IS ICO

This is the abbreviation of initial coin offering, a process whereby blockchain project developer use an instrument to raise funds for their project by offering some fractions of their coin for sale. The developer uses the investors funds as means of actualizing its development goals, launching the product etc.

WHAT IS TOKEN ICO HOSTING PLATFORM

The platform that essentially creates the comfort environment, improvement, seamless, safe and strictly secured manner for both issuers and investors of an ico token to transact.

WHAT IS MASTERNODE

This is crypto full node (computer wallet) that is capable of making some decisions about a particular coin after receiving or holding the required collateral about the coin, it can do the following automatically, locking transaction and instant sending of the coin to the expected wallet.

DIFFERENCES BETWEEN ORDINARY MASTERNODE AND YANUBUKS TOKENS MASTERNODE

	OM	YTM
Required collateral	yes	YES
Timely payout	yes	yes
Required technicality	yes	no
Privacy	yes	yes
Instant transactions	yes	yes
Tokens support	No	yes
Treasury system	yes	yes
Allow voting	yes	yes
Passive income	yes	yes
supports any cryptocurrency	No	Yes

**OM - Ordinary Masternode

**YTM - Yanubuks Token Masternode.

ADVANTAGES OF TOKENS MASTERNODES

- Tokens that offers masternode to their investors create room for them to have more returns on their investments.
- It reduces the amount of coins in circulation.
- It can protect the investors funds to a large extent due to continuous additions to the balance of the investors collateral and this shall become an advantage when the price fluctuations gets normal.

SOME IDENTIFIED TECHNICAL PROBLEMS WITH ICO FUNDRAISING START UPS

We have identified some of the possible problems with a new company trying to raise funds for their project through the blockchain ico methods though the problems are not limited to our discoveries. THUS:

Expensive ico script
Expensive ico hosting service
Inadequate and expensive KYC/AML verifications
Long duration to complete the ico website.
Security of investors funds
Ignorant of marketing bends
So much more

SOLUTIONS

The underlisted are the possible solutions as offered by YANUBUKS company.

- Yanubuks provides world class affordable ico platform.
- Very competitive price compare to our competitors.
- Funds are disbursed directly to the project developer's account in real time.

- Masternode holding with collateral
- Free KYC/AML verifications.
- Zero fees on deposit and withdrawal of funds
- Timely payout of similar tokens based on the collateral of masternode investor.
- Free whitelisting.
- Security of funds.
- Marketing leverage.
- Investors email collection.

YANUBUKS MASTERNODES PAYOUT STRUCTURES

Yanubuks masternode requires 30,000 XYUS as a collateral, it does not require you to keep your computer ON but operates entirely on our cloud based server and pays out as scheduled.

Every user are allowed to have more than one masternode because there is no limit to the number of masternode per one account but only one account is allowed per IP address.

JULY 2019 - 30 XYUS payouts every 12 hours

AUGUST 2019 - 25 XYUS payout every 12 hours

SEPTEMBER 2019 - 20 XYUS payout every 12 hours

OCTOBER 2019 (Till wallet runs out) - 30 XYUS payout every 24 hours

YANUBUKS MASTERNODE SERVICES

The modern days ico projects does not offer much to investors apart from giving them the token they paid for and require them to wait for exchange while some other things are been taking care of; this is a big problem and not good for investment because every investors will like to see their investment growing up. The price of such tokens often dropped when it is been listed in an exchange because there is no reason(s) for investors to hold their tokens.

Yanubuks have decided to step into the game by providing a complete masternode system for any token ever made thereby giving investors the opportunity of earning more tokens while they wait for listing or project roadmap implementations.

ICO HOSTING PLATFORM

Yanubuks is designed to covers all coin with tokens creations functions, we also supports non token cryptocois that can make deposit into MASTER masternode account on our platform.

FEATURES

- 200 masternodes accounts
- Setup your cloud based masternode in minutes.

WHY INVEST

Yanubuks team shall continuously involve in other business models that can create wide distribution, demands and acceptance of XYUS in order to bring about continuous price growth and stability.

Profits made from ico platform processing fees shall be reserved as intervention funds should in case of any dump in the XYUS price.

In the same manner all profits made from the masternode total deposit percentage shall also be reserved as price dump intervention funds .

The above analysis shall make yanubuks a token with intervention funds thereby bringing stable profits to investors.

PROFITS FOCUS WITH MINIMUM TARGET

ICO HOSTING PLATFORM

The ico platform can host more than 500 ico investment at a time. Example with 50 ico clients with minimum package of \$500 i.e \$500 (XYUS) multiply by 50 clients shall create \$25,000 demands on XYUS markets.

MASTERNODES SERVICES

The masternode platform can host more than 1000 masternodes of different coin at any point in time.

Example with minimum order.

100 masternode accounts at \$500 = \$50,000

100 accounts with 100 masternode holders = $100 \times \$2 \times 100 = \$20,000$

This shall create $\$50,000 + \$20,000 = \$70,000$ buy order on XYUS markets.

Though we target more than the above illustrations.

YANUBUKS PLATFORM PROMOTIONAL METHODS

Our team have outlined various types of promotional methods in order to bring in clients which will in turn brings in users.

1. A convincing proposal letter shall be written by experts to introduce our products to both new and old ico projects and cryptocurrencies as the case may be.
2. Social media for maximum exposure
3. Affiliate programs
4. SEO
5. Consultancy/professional marketing strategies
